

Budget Practice Worksheet

Use this worksheet to practice building a monthly budget, calculating leftover cash, and thinking about spending priorities.

Scenario

Jordan takes home \$3,600 per month after taxes. Below are Jordan's monthly spending amounts. Use the table and questions to complete the worksheet.

Category	Monthly Amount
Rent	\$1,250
Utilities	\$180
Groceries	\$420
Transportation	\$220
Insurance	\$160
Phone / Internet	\$110
Dining Out	\$240
Entertainment	\$150
Subscriptions	\$40
Debt Payment	\$200

Part 1 - Calculations

1. What is Jordan's total monthly spending?

Answer: _____

2. How much money is left over each month after expenses?

Answer: _____

3. If Jordan wants to save 15% of monthly income, how much should be saved each month?

Answer: _____

4. Based on the current spending, is Jordan saving at least 15%? Show your work.

Answer: _____

Part 2 - Budget Thinking

5. Which expenses are fixed and which are variable?

6. Name two categories Jordan could reduce to increase savings.

7. Why is it important to compare budgeted spending with actual spending every month?

Part 3 - Create Your Own Budget

Imagine your monthly take-home pay is \$4,000. Write a simple budget for housing, food, transportation, savings, and personal spending. Make sure your total planned spending does not exceed your income.

Category	Planned Amount
Housing	
Food	
Transportation	
Savings	
Personal / Misc.	
Total
